

EXHIBIT D

IN THE IOWA DISTRICT COURT FOR JOHNSON COUNTY

PLANNED PARENTHOOD OF THE
HEARTLAND, INC., EMMA GOLDMAN
CLINIC, and JILL MEADOWS, M.D.,

Petitioners,

v.

KIM REYNOLDS, ex rel. STATE OF IOWA;
THOMAS MILLER, in his official capacity as
Attorney General of Iowa; IOWA
DEPARTMENT OF PUBLIC HEALTH;
GERD CLABAUGH, in his official capacity
as Director of the Iowa Department of Public
Health; IOWA DEPARTMENT OF PUBLIC
SAFETY; STEPHEN BAYENS, in his official
capacity as Commissioner of the Iowa
Department of Public Safety; and IOWA
BOARD OF MEDICINE,

Respondents.

Equity Case No. _____

**AFFIDAVIT OF ABBEY HARDY-
FAIRBANKS, M.D.**

I, Abbey Hardy-Fairbanks, M.D., declare as follows:

1. I am the Medical Director of the Emma Goldman Clinic (EGC). I provide reproductive health care to patients of EGC, including abortion services. I am a board-certified Obstetrician/Gynecologist (OBGYN). At the Emma Goldman Clinic I am responsible for training medical students and residents. In addition, I have given academic presentations on medical and surgical abortion to family medicine and gynecology physicians. I attach my CV hereto as Exhibit 1.

2. I submit this affidavit in support of Plaintiffs' Petition for Declaratory and Injunctive Relief, based on my own personal knowledge.

3. On March 26, 2020, Governor Kim Reynolds issued an Emergency Proclamation

(“the Proclamation”) suspending “nonessential or elective surgeries and procedures that utilize personal protective equipment (PPE).” An aide to Governor Reynolds stated on March 27, 2020 that the Governor’s interpretation of the Proclamation “suspends all nonessential or elective surgeries and procedures until April 16th, that includes surgical abortion procedures.” See Barbara Rodriguez, *Governor’s Office Says Order Suspending ‘Non-Essential’ Surgery Includes Surgical Abortions*, Des Moines Register, <https://www.desmoinesregister.com/story/news/health/2020/03/27/coronavirus-in-iowa-surgical-abortion-suspended-kim-reynolds-non-essential-surgery-proclamation/2930439001/>.

4. EGC is an independent reproductive health care clinic. It provides a full range of reproductive health care services at its Iowa City location. These services include well-women exams, cancer screenings, STI testing and treatment, a range of birth control options including long-acting reversible contraception or LARC, transgender healthcare, and medication and surgical abortion.

5. We provide medication abortion using mifepristone and misoprostol during the first 70 days of pregnancy, as measured from the first day of the last menstrual period (LMP), beyond that period the only option is a surgical abortion. We provide for surgical abortions through 19.6 weeks gestation by LMP, which corresponds to 17.6 weeks post-fertilization.

6. While “surgical abortion” refers to nonmedical abortion, it is not “surgery.” It is an office procedure performed on an outpatient basis.

7. EGC is committed to responding to the current public health crisis, including by preserving needed medical resources that are in short supply. Since the onset of the COVID-19 pandemic, EGC has begun screening patients for symptoms before each visit on the phone at the time of scheduling; doing temperature checks upon entry to the clinic; and has changed the

visitor policy to reduce the number of support persons to one healthy adult per patient. It has reduced patient volume by canceling all non-essential visits and walk-in visits. Patient counseling and education about options, procedures and expectations is being done on the phone to the greatest extent possible. EGC has increased appointment spacing between patients and increased spacing for the chairs in waiting areas, and has aggressively increased cleaning procedures for waiting areas to comply with social-distancing precautions.

8. I have worked at EGC since August 2010, and N95 masks and surgical masks are not used at EGC during abortion procedures and never have been used.

9. Some PPE is used for surgical abortion—such as gloves and reusable protective eyewear that lasts for years. One pair of sterile surgical gloves and three pairs of nonsterile gloves are used per surgical abortion for the doctor and staff. However, only a small number of health care staff are physically present for these procedures or their preparation/recovery and in need of PPE.

10. There does not appear to be a shortage of gloves used for procedural abortions in our community.

11. As a result of the Governor's interpretation of the Proclamation to prohibit "surgical abortions," EGC has been compelled to cancel all surgical abortions.

12. Under the Governor's interpretation, some patients will not be able to obtain an abortion for weeks or even months, depending upon the duration of the COVID-19 pandemic.

13. Some patients scheduled for surgical abortion in the coming weeks will lose their ability to access abortion completely due to Iowa's 20 week-post fertilization ban on abortion. All patients will be unable to opt for abortion at some point if the Governor's interpretation is upheld and the Proclamation is extended beyond April 16, 2020.

14. Forcing patients to continue pregnancies will impose greater strains on an already-taxed healthcare system because prenatal care and delivery involve much greater use of hospital services and PPE than abortions.

15. As the ACOG has recognized, abortion care is essential care. It is a time-sensitive service for which a delay of several weeks, or in some cases days, may increase the risks or potentially make it completely inaccessible.

16. Additionally, some pregnant people who are delayed in accessing abortion may be exposed to additional health risks from COVID-19. ACOG has warned that pregnant women are known to be at greater risk of severe morbidity and mortality from other respiratory infections such as influenza and SARS and possibly COVID-19. As such, pregnant women should be considered an at-risk population.

17. Maternal mortality during pregnancy, delivery and postpartum in the United States, unlike other developing nations, is increasing.¹ Women who opt to continue pregnancies are exposed to increased risks of death and major complications from childbirth and those rates are 14 times higher than for abortion.²

18. Abortion is one of the safest procedures available in the United States.

19. The consequences of being unable to obtain an abortion profoundly impact a person's life, health, well-being, and economic security.

20. The enforcement of the Governor's interpretation of the Proclamation will harm my patients, as they will be prevented from receiving the abortions they need.

¹ Moaddab A, Dildy GA, Brown HL, Bateni ZH, Belfort MA, Sangi-Haghpeykar H and Clark CL. Health Care Disparity and Pregnancy-Related Mortality in the United States. *Obstetrics and Gynecology*. 2018. 131(4):707-712.

² Raymond EG and Grimes DA. The comparative safety of legal induced abortion and childbirth in the United States. *Obstetrics and Gynecology*. 2012 119(2 Pt1):215-9.

21. My patients will lose their ability to decide their future and determine what is best for their welfare and that of their family.

22. Unwanted pregnancies are especially hard on low-income and poor women, as well as women in abusive relationships. Restrictions on abortion disproportionately affect the most vulnerable among us.

23. We know that when abortion is banned or severely restricted, women will seek means to end unwanted pregnancies that are outside of the extremely safe practice of legal abortion. They can be significantly harmed or die from doing so.

24. If the Proclamation is enforced according to the Governor's interpretation, it will cause undue risk to my patients' current and future health.

25. I declare under penalty of perjury that the foregoing is true and correct.

I certify under penalty of perjury and pursuant to the laws of the state of Iowa that the preceding is true and correct.

A handwritten signature in blue ink, appearing to read 'Abbey Hardy-Fairbanks', is written over a light blue rectangular background.
