## Hinson Statement on the CHIPS and Science Act

**Washington, D.C.** - Congresswoman Ashley Hinson (IA-01) released the following statement on the CHIPS and Science Act.

*"While I support the original intent of this legislation, the final \$80 billion package will drive up inflation, undermine our long-term competitiveness, and could allow taxpayer dollars to boost Communist China's economy. This is yet another example of Washington chaos and dysfunction standing in the way of legitimate solutions to serious challenges. We need policies that incentivize domestic semiconductor production and spur U.S. innovation – not careless spending bills with backdoor funding to our adversaries."* - **Congresswoman Ashley Hinson**
