WAHLS FOR US
SENATE!

👋 To anybody who cares about taking back the Senate majority for Democrats, please read this important update from Zach Wahls' campaign.

Today is Sunday, October 12, and a new poll shows Zach with a *two-point lead* in Iowa's Senate race!

This is a big deal: The Senate majority hinges on Iowa. Election experts say we have the best chance to flip Iowa blue in a generation, but it won't be easy.

National Republicans are lining up behind Ashley Hinson — including funding a new six-figure ad buy this month. They know Zach has what it takes to win in Iowa, so they are going to spend, say, and do whatever it takes to stop our momentum.

Unlike Ashley Hinson, we don't rely on corporate PACs or special interests to fund our campaign. Zach is powered by grassroots supporters like you, giving what they can.

If everyone reading this donated even \$10 right now, we could make sure Zach has the resources to overcome the GOP's attacks and share his message with persuadable Iowans across the state.

But not everyone will give, which is why we're asking you directly, Laura:

If you are fed up with the direction of our country — and you are ready to put in the work to take back the Senate majority — will you please pitch in \$10 to Zach's campaign in Iowa before the weekend ends?

If you've stored your info with ActBlue, we'll process your contribution instantly:
