

This week, the House passed some very important bills:

I voted YES on the FY26 [National Defense Authorization Act \(NDAA\)](#). It delivers a much deserved pay raise for our troops, invests in the next generation of military strength so that we can compete with China and Russia, and restores merit, not DEI, as the foundation of our armed forces. A stronger military means a safer, more secure future for every American.

I proudly voted to pass Representative Gabe Evans' [State Planning for Reliability and Affordability Act](#). This commonsense bill [ensures](#) states plan ahead for rising energy demand, keeping the lights on and costs down. After years of failed energy policy under Joe Biden, we're

getting back on track and working to deliver affordable and reliable energy to millions of Americans.

I voted in favor of the [INVEST Act](#), a common-sense reform that helps Main Street raise capital, grow, and hire. As a former small business owner, I know how hard that is. This bill makes it [easier](#) for family-run businesses to access funding and gives more Americans a shot at investing in their future.

I voted against the House Democrats forcing another President Trump [impeachment](#) vote. This has become a perennial thing by the Democrats, wasting time. I voted no because we're continuing to work to get prices down, make housing more affordable, reduce energy costs, and make food prices affordable for Iowa families. I will continue [focusing](#) on these priorities alongside President Trump so we can deliver meaningful results.

I voted for the [PERMIT Act](#) which limits the scope of the Clean Water Act by redefining navigable waters to exclude waste treatment systems, ephemeral features that flow only in direct response to precipitation, prior converted cropland, groundwater, or any other features determined to be excluded by the U.S. Army Corps of Engineers.

## [Committee Hearings](#)
